Senior Contract Manager

Location : Taipei, Taiwan
Position : Full Time
Experience : Mid-Senior Level

JUMBO Consulting Group is seeking an experienced contract manager with extensive experience with contract management of large-scale infrastructure contracts from either renewable energy projects or related industries.

This is a unique opportunity to work in an international environment with some of the most experienced industry professionals and with international developers and suppliers.

The Job

As Senior Contract Manager, you will be supporting our client with contract management of WTG Supply and WTG T&I contracts for an offshore wind project.

This position will report to the procurement director and will work alongside the project manager for the WTG Package.

Key Responsibilities / Tasks:

- Ensure a successful project delivery, balancing risk with solutions that are commercially and contractually viable.
- Keep a continuous overview over critical milestones, assess and manage rights and obligations according to the contract.
- Direct and process changes in the project and ensure that the changes are implemented in compliance with our client's commercial interests.
- Provide interpretation of contracts, organize and process correspondence with contracting parties and monitor fulfillment of contractual obligations.
- Manage the commercial relationship and communication with contractors during the execution phase of the project, keeping close dialogue with them to ensure that issues are dealt with proactively with diligence and foresight.
- Ensure timely delivery of the contract within the set mandate.
- Drive governance processes and required presentation material towards different stakeholders and decision bodies such as the Steering Committee.
- Contribute to further developing processes regarding contract management.
- Perform all other position related duties as assigned or requested.

Skills and Experience Required:

Relevant education, e.g. in quantity surveying, Bachelor or Master's degree in Economics, Law, Business Administration or Engineering, and minimum 5 years of relevant experience with contract management of large-scale infrastructure projects.

The ideal candidate has solid contract management experience in a multi-cultural project environment within the energy sector and possess the following:

- A strong commercial outlook with excellent collaboration and negotiation skills
- Ability to keep a sound overview that allows you to act proactively while still having the eye for details to ensure high quality
- Structured personality with solid project management experience with the ability to combine multidisciplinary inputs and deliver informed solutions
- Good team player with an entrepreneurial mindset
- Excellent communication skills with ability to present and communicate complex matters on various levels
- Technical / commercial / contractual skill set
- Previous relevant experience in execution phases of offshore wind or similar industries preferably with FIDIC Yellow Book based contracts
- Experience with WTG (supply and/or installation) is preferable but not an absolute requirement
- Fluent in English
- Interested in traveling as part of the job

What We Offer

We offer a lot of autonomy, responsibility, and the opportunity to work with and learn from some of the most experienced professionals in the offshore wind industry. We offer a competitive salary package and an exciting and challenging work environment.

We ensure a workplace that encourages growth, flexibility and creativity, as well as a company culture that champions inclusion, diversity and overall employee well-being. Our core values which include respect, transparency, honesty and dedication define who we are, how we act and what we aspire to.

Qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, sexual orientation, gender identity, disability or protected veteran status.
